Error. Storages

DEADLINE: 24/06/2022, 18:00

FOLDER STRUCTURE

```
COE1_HW6/ *                                        *  - required
├── task
├── homework/ *
│       ├── index.html *
│       ├── page_1.html *
│       ├── page_2.html *
│       ├── page_3.html *
│       ├── css/ *
│       │      ├── main.css *
│       ├── js/ *
│              ├── index.js *
```
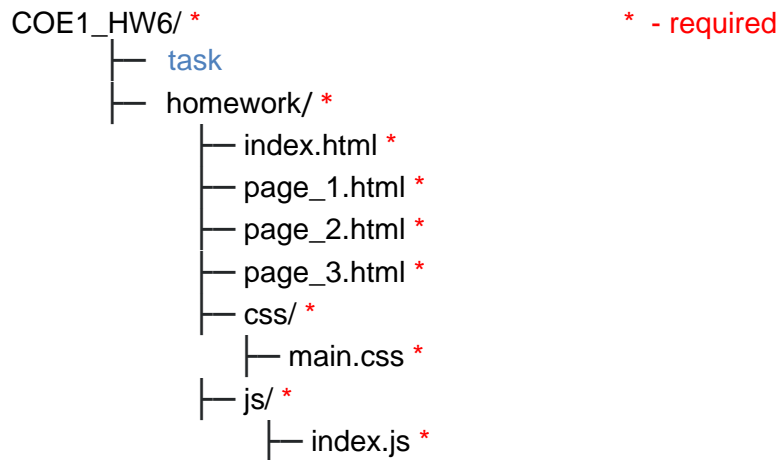

TASKS

Task.

- You need to implement two functions in *index.js* – visitLink and viewResults.
- visitLink function should save to localStorage how many times each link was clicked (visited).
- viewResults should display a list how many times each link was visited (see example below) and afterwards clear the storage

Home   Page 1   Page 2   Page 3

Welcome to Local Storage Homework

View page visits results

- You visited Page3 13 time(s)
- You visited Page1 7 time(s)
- You visited Page2 14 time(s)

RESTRICTIONS

- Editing index.html is forbidden.
- Adding **task/** folder is forbidden. Do not push it to repository. (Only **homework/** should be pushed)

BEFORE SUBMIT

- Code should be clean, without comments, readable, and tested
- Make sure your GitLab folder structure meets folder structure from this document (without **task** folder)

SUBMIT

- The **COE1_HW6** folder without **task** folder should be uploaded to GitLab repository "**COE-1**" into **main** branch.
